

FIELD NOTE #1

*Skills should produce
artifacts,
not markdown.*

A Claude Code skill we just open-sourced.

↗ SWIPE THROUGH →

THE PROBLEM

The markdown ceiling.

Most agent skills end at "here's a markdown summary." That's where the useful part should start.

A dashboard	<i>isn't text. You scan it.</i>
A comparison	<i>isn't text. You sort it.</i>
A status page	<i>isn't text. You refresh it.</i>
A mockup	<i>isn't text. You iterate on it.</i>

*— a recurring pattern
while building Ikenga's
exec views*

THE SHIP

Single-file HTML artifacts.

Four hard rules:

01 One file, self-contained.

No build step. No folder of assets. No "install this first."

02 Renders offline.

Mock data declared inline. Opens with no network.

03 Renders anywhere.

file://, claude.ai's artifact viewer, the Ikenga shell.

04 Declarative data sources.

Supabase / SQL / fetch / MCP / file-watch. Same file lights up with live data inside the shell.

REFERENCE 01 / 04

hello-world

~150 LINES · 1 SOURCE

The smoke test. The smallest possible artifact. Renders in any browser, with mock data, in under a second.

The image is a screenshot of a web application interface. At the top left, it says "Hello, Artifact" in a large, bold, black font. Below this, in a smaller font, it says "10 users loaded · host: browser". To the right of this text is a button labeled "Refresh". Below the header is a table with five rows, each representing a user. The table has a light gray background and is bordered by a thin gray line. The first row shows "Leanne Graham" with email "Sincere@april.biz" and company "Romaguera-Crona". The second row shows "Ervin Howell" with email "Shanna@melissa.tv" and company "Deckow-Crist". The third row shows "Clementine Bauch" with email "Nathan@yesenia.net" and company "Romaguera-Jacobson". The fourth row shows "Patricia Lebsack" with email "Julianne.OConner@kory.org" and company "Robel-Corkery". The fifth row shows "Chelsey Dietrich" with email "Lucio_Hettinger@annie.ca" and company "Keebler LLC". At the bottom of the page, it says "Ikenga artifact · v0.1 · open in claude.ai or Ikenga shell for live data". The entire interface is set against a light gray background.

REFERENCE 02 / 04

cfo-daily

~330 LINES · 4 SOURCES

KPI tiles, AR aging, FX, cash-by-account. Four data-source types in one file. Same file, mock data offline; live data inside the shell.

Showing mock data for one or more sources — live host (Ikenga shell) not connected.

Ikenga

The Igbo Symbol of Power, Achievement, and the Strength of the Right Hand

Compiled from Igbo cultural sources

A field-journal reading of the cultural figure that gave the Ikenga product line its name.

01 INTRODUCTION

What is Ikenga?

Ikenga (literally "the place of strength") is a horned anthropomorphic figure central to the spiritual and personal life of the Igbo people of southeastern Nigeria^[4] — a carved embodiment of a man's achievements, ambition, and the power of his right hand.^[2]
